

## General Purchase and Take Over Conditions of Südzucker AG (Werk Zeitz – Stärkefabrik) for EU 27 – Grain

Version: ZG-01-2023 | valid as of 01.01.2023

**Note: An English translation is provided for mutual convenience. In case of any dispute or discrepancy between the German and English version, the German version is leading.**

### General

Only wheat which fulfills the following conditions will be accepted:

Good, healthy, dry, not moistured, commercial quality, cleaned, largely free of dust, cleaning parts/aspiration residues and living crop pests.

The seller guarantees that the wheat is fully marketable in Germany, complies with the relevant national and European legal provisions as well as the regulations and directives of authorities, professional associations and trade associations and was produced in accordance with good agricultural practice.

The seller also guarantees that the wheat is not from fields fertilized with sewage sludge.

The grain is not subject to any provisions on the authorization, labeling or traceability of genetically modified feed in accordance with Regulation (EC) No 1829/2003 and 1830/2003.

The wheat was not subjected to irradiation.

The MAXIMUM RESIDUE LEVEL (MRL) as specified in Regulation EC No. 396/2005 is not exceeded. The MRLs as specified in Directive 2002/32/EC are also not exceeded.

The wheat has not been subjected to direct drying and contains no preservatives.

Post-harvest chemical treatments for health maintenance of the wheat, e.g. for storage protection (also with parts of a lot) must be communicated to the buyer and the goods recipient in written form. Treatment with Chlorpyrifosmethyl and Chlorpyrifosethyl is not allowed.

The wheat is free from material and legal defects and has in particular the condition required by these purchase and takeover conditions as well as the product specification and quality required.

### Certifications

The supplier has a valid GMP+ certification at the time of delivery and the goods comply with the GMP+ requirements in the area of quality and transport. Prior to delivery, the supplier is obliged to present a corresponding certificate. The supplier is also entitled to present other certifications equivalent to the GMP+ status.

As the product is used also for the production of biofuel, the seller and the goods supplied must have a corresponding valid sustainability certification at the time of delivery, according to the requirements of Directive (EU) 2018/2001 [RED II or Renewable Energy Directive II] on the promotion of the use of energy from renewable sources.

Relevant valid certificates for the agreed delivery period must be presented in copy to the buyer before the start of the delivery. If a certification is withdrawn from the seller, the supplier must inform the buyer immediately and is not entitled to deliver for the duration of the withdrawal. The seller is liable for all resulting costs and consequences.

The seller can also be made liable for damages if it turns out after the delivery that the delivered wheat is not sustainable or does not have the GMP+ status in accordance with the GMP+.

### Delivery and Receipt

Place of delivery is in general the factory of the starch factory in Zeitz (Albrechtstraße 54 | 06712 Zeitz). In exceptional cases the buyer is entitled to assign a different warehouse within 10 kilometers of the original storage location.

Unless otherwise agreed, the contract volume shall be delivered in approximately equal shares over the agreed delivery period.

Deliveries to the buyer are only possible using the myleo/dsc system described in more detail in the next paragraph.

#### **- myleo/dsc**

To book the deliveries, an internet-based system is used. It is required that the seller signs a user agreement with the platform operator. The first contact is made by the buyer.

When booking in myleo/dsc, the seller is required to provide the following information:

- The VAT number is mandatory when booking deliveries or making an appropriation. This binding information will be taken into account when the credit note is created. Vendors with multiple VAT numbers are required to ensure that the correct data is provided when booking or making an appropriation.
- Specification of harvest year according to the EU grain year
- Specification of country of origin
- Information regarding sustainability (certificate, partial default value or specific value (NUTS2-value))

In the case of incorrect information, requiring an alteration after delivery, we reserve the right to charge an administrative fee of € 35 per transaction.

After the delivery the seller can see the quantities and analysis values determined at delivery in myleo/dsc.

#### **- Delivery by Truck (Call)**

The seller is assigned a weekly call quantity. Afterwards the booking in the myleo/dsc-system is possible. The seller is responsible for the booking and the adherence to the binding delivery dates.

The booked delivery dates are considered as an option contract agreement within the meaning of the Unified Contract Terms for the German Cereals Trade. If these delivery dates are not met without a written notification, the seller is automatically in default.

In general, the seller is obliged to inform the logistics department of the plant about non-fulfillment or postponement of delivery dates.

The seller is obliged to submit a duly completed delivery note to the grain laboratory before sampling of the truck. The delivery note must enable a clear traceability of the goods.

The delivery can only be done with backward tipping trucks.

At the point of delivery, compliance with GMP+ requirements in terms of transport and product quality is regularly checked.

Persons entering or driving on the premises are obliged to follow the safety and hygiene regulations and the instructions of the personnel of the factory. The regulations are visible at the factory gate.

The truck acceptance times result from the quantity release by the buyer in myleo/dsc. Demurrage will only be granted if the buyer is culpably responsible for a delay in acceptance and the seller has arrived within his originally booked time window in myleo/dsc.

#### **Impediments to Fulfilment**

Technical defects at the production plant of the buyer, which make its operation impossible, are explicitly an impediment to fulfilment, within the meaning of § 20 of the Unified Contract Terms for the German Cereals Trade.

#### **Sample Taking**

Before accepting the goods, the buyer will take average samples per truck/wagon. A part of these will be examined prior to unloading for the parameters relevant according to the contract, and a retention sample is kept for a period of six months for the purpose of traceability.

The seller may, at his own expense, instruct a recognized/accredited control company to seal the samples during sample taking together with a representative of the buyer.

Unless otherwise agreed between the parties, the quality determined at the place of unloading is binding.

### **Analyses**

The analysis at the place of delivery are executed in the in-house laboratory of the buyer. Only defined analysis methods are used to determine the quality parameters.

If the buyer identifies deviations of the specified limits by own analyses at an external laboratory, the seller may initiate an arbitration analysis within 5 working days. This also applies to the quality assessments of the buyer at the time of delivery.

If the seller requests an arbitration analysis, the retention sample will be divided and sent to the arbitration laboratory on account of the seller. The seller has the right to monitor the separation of the sample.

In these cases, the Detmolder Institut für Getreide- und Fettanalytik (DIGeFa) is defined as the arbitration laboratory. If the DIGeFa can not analyse a particular parameter, a laboratory accredited for the corresponding analysis in grains is agreed. If the arbitration laboratory determines different values, the mean of the two results is binding.

### **Quantity Margins**

Unless otherwise agreed, the contractually agreed quantity is defined as minimum and maximum quantity, respectively.

With a remaining quantity of <15 mt delivery and acceptance are not required. With a remaining quantity of > 15 mt delivery and acceptance are required.

### **Weight**

The weight determined on the calibrated scales of the buyer is binding. The determined analysis data as well as the weight are documented on the weighing slip, which is received by every truck when leaving the weighing platform at the exit.

In the case of a block train delivery, the seller receives a discharge report from the logistics department in Zeitz after unloading is completed. Unless the discharge report is objected within 5 working days, the stated data is considered final.

In addition, the data is available in the system immediately after delivery of the goods.

### **Payment**

Unless otherwise agreed, the payment of the goods takes place within 14 days after delivery by credit note procedure including possible quality deductions.

Payments are made exclusively to the bank details filed with the buyer. If these data change, the seller is obligated to inform the buyer in good time.

In the event of a subsequent change of credit notes due to incorrect information provided by the seller or one of his agents, a processing fee of € 35 per changed delivery will be charged for the additional administrative costs.

### **Frame Contracts**

The pricing of frame contracts is done by mutual agreement on the screen at the bid price or against actuals. At the latest on the date specified in the frame contract. In general at least 500 mt have to be priced.

### **Ranking of Contract Documents**

If the individual contract documents contradict each other, the following order of priority is determined for their validity:

1. Written confirmation of the individual trade by the buyer or a broker authorized by the buyer.
2. General Purchase and Take Over Conditions of Südzucker AG (Werk Zeitz – Stärkefabrik) for Grain and subsequently:
3. Unified Contract Terms for the German Cereal Trade in its latest version at the time of delivery.
4. Supplier code of conduct [Supplier\\_Code\\_of\\_Conduct.pdf \(suedzuckergroup.com\)](#)

The written contract confirmation of the individual trade must always be signed by the seller and returned. The request for signature and return is not a request for a new contract, but serves solely for the mutual documentation of the agreed legal transaction.

The validity of the contract remains unaffected even if the seller does not return the written confirmation countersigned.

General sales conditions of the seller are not relevant, even if the buyer does not expressly contradict them.

Collateral agreements, changes and additions to the delivery agreements must be made in writing and require the written confirmation of the buyer for their effectiveness. This applies in particular to changes in delivery dates or quantities.

### Place of Jurisdiction

For all disputes arising out of or in connection with the purchase of grain by Südzucker AG, the arbitral tribunal of the Grain Traders Association of the Hamburg Exchange e.V. (Hamburg) is considered agreed under their rules of arbitration.

### Product Specification and Quality

Product name: **WHEAT**

The basic quality listed in the table as well as the respective deduction and refusal agreements are applied Regulation (EC) No 687/2008 Annex II continues to apply to the definition of individual quality parameters. If the buyer detects e.g. in the context of harvest screening, an increased burden of undesirable substances in certain regions/ countries, the seller is informed about additional requirements with a supplier information.

Parameter	Wheat Basic quality	Method	Deductions/Refusal	
Natural weight (kg/hl)	basis 72	NIR	71 – 69 < 69	deduction 1 : 1,5 rejection
Moisture (%)	basis 14,5	NIR	14,6 – 16,0 > 16,0	deduction 1: 2 rejection
Protein (%)	min. 10	NIR	< 10,0	rejection
Small-/broken grains (%)	max. 10		> 10,0	rejection
Small grains (%)	max. 5	mechanical sample cleaner		
Broken grains (%)	max. 5	mechanical sample cleaner		
Sprouted grains (%)	max. 5	visual/counting	> 5	rejection
Impurities (%)	max. 2	sieving/selection	> 2	rejection
thereof foreign matter (%)	0,5	mechanical sample cleaner	0,6 – 1,1 1,2 1,3 1,4 1,5 > 1,5	deduction 1: 1 deduction 1,5 % deduction 2,0 % deduction 2,5 % deduction 3,0 % rejection
Ergot (g/100g)	max. 0,05	visual	> 0,05	rejection
DON (Deoxynivalenol) (mg/kg)	max. 0,5	strip test (internal)/	> 0,5	rejection
ZEA (Zearalenone) (mg/kg)	max. 0,05	LC-MS/MS (external)	> 0,05	rejection
OTA (Ochratoxin A) (mg/kg)	max. 0,005	LC-MS/MS (external)	> 0,005	complaint
Sum of Aflatoxin B <sub>1</sub> , B <sub>2</sub> , G <sub>1</sub> , G <sub>2</sub> (mg/kg)	max. 0,004	LC-MS/MS (external)	> 0,004	rejection
Cadmium (mg/kg)	max 0,2	accr. laboratory for grain	> 0,2	complaint
Lead (mg/kg)	max. 0,2	accr. laboratory for grain	> 0,2	complaint
T-2 / HT-2-Toxin (mg/kg)	max. 0,5	HPLC (external)	>0,5	complaint
Starch (OS) (%)	min. 58	NIR	< 58	right to reject
